## Latin America and the Caribbean Overview:

In Latin America, two thirds of the investments in research and development are funded by State resources (UNESCO,2010). Funding for open access initiatives comes, directly or indirectly, from public funds and from international cooperation. Key open access players are national science agencies and universities (mainly libraries, journal editors, press units, ICT units, research/academic areas).

The region has a long tradition of regional information networking to provide open access to its research results, in **regional subject repositories** that started with bibliographic records in the 80's and now added full-texts, and in **multidisciplinary regional peer-review journal portals** developed since the end of the 90's. These two are the most important contributions from the region to the open access movement, together with the introduction in Congress, in Brazil (2007) and in Argentina (2010), of a Parliament bill, still in debate, for open access legislation at national level that mandates deposit of State funded research results in digital repositories.

In the absence of commercial academic publishers, model prevailing in developed regions, free print distribution of scientific and academic publications has been the norm and the printed version has historically suffered from irregular publication and

- ▶ MANIOC

OA is contributing towards better integration of LAC in global conversation and knowledge societies

*3 pillars “Towards knowledge societies” UNESCO, 2005*

- ✓ **“identifying the types of knowledge they possess, boosting their value”**
- ✓ **“Raising awareness of the wealth of available knowledge requires a mobilization of all players in society.**
- ✓ **“better integration of knowledge policies..... need for open access policies.... “**

## **background of open access in the region, enabling factors**

- **shared problems and needs**
- **shared language in LA (Spanish+Portuguese)**
- **State funded research and publishing**
- **tradition of regional cooperative information networking systems, ex.: agriculture (SIDALC), work (LABORDOC), health (BVS), social sciences (CLACSO, CLASE)**
- **OA publishing systems: SciELO, Redalyc, OJS**
- **Open technologies, ex.: Dspace, Greenstone,**
- **absence of commercial academic publishers**
- **research output not in ISI (lost science)**

“Clearly, the structure of scientific power is affected by Open Access, and, as result, that structure should be kept in mind while framing strategies aimed at fostering Open Access. It is difficult to imagine, except rhetorically, how advocating for Open Access can be divorced from working for a different structuring of power in science”

Guédon, Jean-Claude . *Open Access and the divide between “mainstream” and “peripheral” science.*, 2008.  
<http://eprints.rclis.org/10778/>

## Local and regional knowledge in **green open access**:

### ✓ **institutional repositories (institutional outputs)**

*main contents:* thesis, journal articles, books, multimedia, research reports, conference papers.

*more recently:* learning objects, datasets

### ✓ **subject digital repositories, ex.:**

- **UN information systems:** a % of full-texts
  - Ex.: agriculture (AGRIS), work (LABORDOC, CARIBLEX), health (BVS)
- **social sciences (CLACSO)**
- **public administration (SIARE)**
- **Digital Library of the Caribbean**
- **MANIOC**

### Proportion of Repositories by Continent - Worldwide

LAC: 223 institutional  
repositories (10% of world  
total)

## Growth of the OpenDOAR Database - South America

This graph shows the changing size of the *OpenDOAR* Database over time.

The shape of the chart in 2006 reflects the work of *OpenDOAR* rather than the growth of the number of actual repositories. A backlog of new records built up while the database was being redeveloped during mid-2006.

## Content Types in OpenDOAR Repositories - South America

N.b. Most repositories hold several Content Types.

[Show embedding code](#)

### Content Types in OpenDOAR Repositories - Caribbean

N.b. Most repositories hold several Content Types.

AVISO

O cadastro no Diretório de Revistas do SEER  
encontra-se novamente disponível para atualizações e registro de novos títulos.

O Sistema Eletrônico de Editoração de Revistas (SEER) é um software desenvolvido para a construção e gestão de uma publicação periódica eletrônica. Esta ferramenta contempla ações essenciais à automação das atividades de editoração de periódicos científicos. Recomendado pela CAPES, o processo editorial no SEER permite uma melhoria na avaliação da qualidade dos periódicos e uma maior rapidez no fluxo das informações. A aceitação do SEER pela comunidade brasileira de editores científicos vem do desempenho do sistema e de sua fácil adaptação aos processos de editoração em uso. Também o SEER permite que a disseminação, divulgação e preservação dos conteúdos das revistas brasileiras apresentem uma melhoria na adoção dos padrões editoriais internacionais para periódicos on-line 100% eletrônicos.

O Sistema de Eletrônico de Editoração de Revistas (SEER) é resultado da prospecção tecnológica realizada pelo IBICT para identificar aplicativos que possibilitassem o tratamento e a disseminação da produção científica brasileira na Web. O sistema SEER surgiu, assim, em 2003, a partir da customização do Open Journal Systems (OJS), software de gerenciamento e publicação de revistas eletrônicas desenvolvido pelo [Public Knowledge Project](#) (PKP), da University of British Columbia. Trata-se de uma inovadora iniciativa do IBICT que, imediatamente após a tradução do software OJS para o português, publicou na Web o primeiro periódico brasileiro utilizando essa tecnologia, a revista [Ciência da Informação](#). A partir de então, o IBICT iniciou o processo e distribuição do SEER a editores brasileiros interessados em publicar revistas científicas de acesso livre na Web e a promover a capacitação técnica no uso dessa ferramenta, em treinamentos sistemáticos realizados a partir de novembro de

## SISTEMÁTICA Y TAXONOMÍA DE PLANTAS VASCULARES

### A valid name for the taxon known as *Tillandsia bryoides* auct. (Bromeliaceae)

Sabina Donadio

Instituto de Botánica Darwinion (CONICET-ANCEFN), Labardén 200, Casilla de Correo 22, B1642HYD San Isidro, Buenos Aires, Argentina; [sdonadio@darwin.edu.ar](mailto:sdonadio@darwin.edu.ar)

#### Abstract

*Tillandsia bryoides* was sunken into the synonymy of *T. tricholepis* because all the elements of the lectotype (*P. Lorentz* 128, BM) belong to the latter species. However, there are many vouchers from different herbaria (some of them cited as reference material in several publications) previously identified as *T. bryoides*, that in fact correspond to a new species of *Tillandsia* subgen. *Diaphoranthema*. This new species has yellow, sessile, solitary flowers and a glabrous floral bract, and grows in central Peru, Bolivia, and central and northwestern Argentina. This paper provides a valid name for this species, an illustration, distribution data, and a discussion of the relationships with its morphologically closest species.

**Keywords.** Bromeliaceae; *Diaphoranthema*; Taxonomy; *Tillandsia*.

#### Resumen

*Tillandsia bryoides* fue incluida en la sinonimia de *T. tricholepis* porque todos los elementos del lectotipo (*P. Lorentz* 128, BM) pertenecen a esta última especie. Sin embargo, se observaron en el campo, en distintos herbarios y en diversas publicaciones,

 Datos: redalyc.org a partir de 145,515 artículos del acervo 2005-2011 de 800 revistas.  
 Metodología: <http://www.redalycfractal.org/met> Generación: Diciembre 2012.

# Redalyc reports for institutions, journals, subjects

Universidad Nacional  
Autónoma de México

Portal de Portales  
latindex

## Regional journal articles harvester

- 1.295.547 articles from Iberoamerica
- Harvesting journal portals
- OA Harvester 2 de PKP

The screenshot displays the Portal de Portales latindex interface. It features a search results table with columns for article titles, authors, years, and journal information. The word 'pobreza' (poverty) is highlighted in orange in several article titles. To the right of the table, there are navigation buttons: VER, REGISTRO, TEXTO, and COMPLETO. Below the table, there are logos for SciELO Chile, reAlalyc, and Dialnet. The bottom of the page shows a search bar and a list of related articles.

Article Title	Author(s)	Year	Journal
y exclusión social: los múltiples rostros de Caracas	Sánchez, Leslie; Ruiz Flores, Juan Carlos		
Prueba piloto y validación del índice sintético de pobreza	Guillermo Ramírez; Alberto Camardiel; Maura Vásquez	2001	Revista Venezolana de Análisis de Coyuntura (Venezuela) Num.002 Vol.VII
Políticas públicas de combate a la pobreza en Yucatán, 1990-2006	Susana Pérez Medina	2011	Gestión y Política Pública (México) Num.2 Vol.XX
Pobreza femenina: ¿pobreza escondida?	Brunet Icart, Ignasi; Valls, Francesc; Belzunegui Eraso, Angel Gabriel	2009	RIO: Revista Internacional de Organizaciones, ISSN 2013-570X, Nº. 3, 2009 (Ejemplar dedicado a: Pobreza, Exclusión Social y Género), pags. 91-110
Pobreza subjetiva en México: el papel de las normas de evaluación del ingreso	Elisa Jiménez; Mariano Rojas	2008	Perfiles Latinoamericanos (México) Num.32

## **critical success factors** **of open access initiatives in Latin America**

- funding for open access: directly or indirectly, from public funds+international cooperation
- regional scope
- participatory
- perceived benefits of OA
  - improves quality, visibility and access
  - international visibility in academic harvesters and search engines
  - provides the basis for regional indicators and complementing/comparative international indicators

## **barriers for further OA adoption**

- **access (technology,language,education)**
- **research evaluation based on impact factor IF**
- **lack of indicators from OA regional portals**
- **“author pays” open access business models**
- **funds for institutional/national repositories**
- **needed local contents in OA digital repositories / OA mandates / OA legislation**

# OA mandates and legislation

## OA mandates in LA

- 20 institutional OA mandates from Latin America (4% of 482 mandates registered in ROARMAP)
  - Argentina
  - Bolivia
  - Brazil
  - Colombia
  - Perú
  - México
  - Venezuela

OA legislation in LA

Presently discussed in Congress in:

- ARGENTINA
- BRAZIL
- PERU

State funded research results made available OA in digital repositories

# Challenges: dissemination of results is part of the research cost

**“better integration of knowledge policies..... need for open access policies.... “**

*UNESCO ´s first World Report 2005 “Towards knowledge societies”*

- **Prevent new enclosure to government funded research results**
- **Promote OA free for authors-free for users**
- **Institutional repositories+harvesters: no charge for authors**
- **Commercial editors and open access entrepreneurs can contribute with value-added services and charge for those additional services, ex. mega journals, epi journals....**

## **Challenges: Knowledge as a shared resource, as a commons**

**Charlotte Hess and Elinor Ostrom.**

**Understanding knowledge as a commons, MIT, 2006**

- **discuss how to define, protect, and build the knowledge commons in the digital age, sharing responsibilities and costs.**
- **avoid new enclosures**
- **participatory approach to open access**
- **OA policies and mandates**  
**contents: texts+data+multimedia**

## Challenges: new formats of research communication not only peer-reviewed

## **Challenges: review research evaluation procedures**

**"Until the emphasis on publication in established high impact subscription journals and on metrics as a measure of quality is altered, open access will face ongoing challenges"**

**Tim Berners-Lee, WWW creator**

- Develop indicators in OA portals from the region to complement evaluation indicators from ISI and SCOPUS
- Incorporate altmetrics
- Institutional repositories: metadata describing evaluation procedures of digital objects
- Advocacy among high level officials

## Challenges: support for regional OA cooperation

Raising awareness of the wealth of available knowledge requires a mobilization of all players in society.  
*UNESCO World Report "Towards knowledge societies" (2005)*

- Latin America – Caribbean OA cooperation
- Research on OA needs and priorities (ex. UNESCO, INASP, IDRC-FLACSO)
- Development of OA indicators + analysis (ex.Redalyc)
- OA policies, mandates: OA advocacy at Executive and Legislative
  - ministerial regional meeting (education + S&T)
  - National research councils + university networks
  - S&T Congress commissions (when OA bill introduced)(well funded publishing lobby needs well funded OA lobby)
- Translate UNESCO OA Guidelines and GOAP
- Interoperability of green and gold OA repositories from LAC
- Training
- OA linked to e-learning, OER, e-science

# INTERNATIONAL SEMINAR OPEN ACCESS FOR DEVELOPING COUNTRIES

BIREME/PAHO/WHO

recomendations

presentation

Salvador Declaration on Open Access: The Developing  
World Perspective

- We urge governments to make Open Access a high priority in science policies including:
- requiring that publicly funded research is made available through Open Access;
- considering the cost of publication as part of the cost of research;
- strengthening the local OA journals, repositories and other relevant initiatives;
- promoting integration of developing countries scientific
